

Regeneration Purifier System For HALON-1211

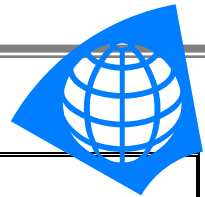

Model No. : CH-HL513-B

Features :

- Vapor Recovery and Liquefied systems design.
- Nitrogen gas purged automatically.
- HALON-1211 Liquid transfer from inner tank to cylinders.

Specification :

Model No.	CH-HL513-B
Power	3Φ×380V×50/60HZ , Rated power 12.0HP
Main recovery Compressor	Hermetic reciprocating compressor. With suction pressure Auto-Control.
Vacuum recovery Compressor	Vacuumping stage compressor 3Φ×380×50/60HZ , 1.0HP
Refrigerator	Low temperature heat transfer design , 5.0HP
Purge System	Non-condensable vapor purged automatically
Liquid Transfer Pump	Displacement Type controlled with inverter
MAX. Recovery/Recycling Rate (Vapor)	0.6 kg/M
MAX. Recovery/Recycling Rate (Liquid)	2.5 kg/M
MAX. Liquid Pump Rate	16 kg/M
Cabinet dimensions	167×120×150 CM (L×W×H)
Shipping weight	620 kg
